

Renewable Energy in Modern India

India is one of the world leaders in renewable energy transition and sustainable development.

The country has set an ambitious target of achieving 500 GW of non-fossil energy capacity by 2030.

Solar parks such as Bhadla Solar Park in Rajasthan are among the largest photovoltaic power stations globally.

The International Solar Alliance (ISA) was jointly launched by India and France to mobilize investments in solar infrastructure.

National Green Hydrogen Mission aims to make India a global hub for the production and export of green hydrogen.
